Applicant's arguments received on 27 October 2003 have been fully considered. Claims 23-28 are therefore allowed with the additional limitations included. Claims 1-16 were previously allowed for the reasons indicated in the previous Office action, mailed 27 August 2003, paper no. 7.

Examiner's Statement Of Reasons For Allowance

The following is an examiner's statement of reasons for allowance: In regards to Claims 23-28, the prior art of record in this application fails to disclose or reasonably suggest a DWDM system with a biporose pigtail with two holes at a predetermined different distance from the center axis of the pigtail to secure an input and output fiber, a graded index lens coupled to the pigtail with a signal transmitted through the input fiber through the lens and through an adhered filter so that the signal reflects back from the filter, through the lens are to the return fiber. The closest prior art of record is in Applicant's own "Prior Art" section. Applicant discloses a DWDM system with an input and output optical fiber, a biporose pigtail with two holes to secure the input and output fibers, a graded index lens coupled with the pigtail with a signal being transmitted from the input fiber can enter the lens, a filter adhered with the other end of the graded index lens with a reflected signal from the filter is transmitted through the lens to the return fiber. However, Applicant fails to disclose a predetermined different distance of the two holes from the center axis in the biporose pigtail. Therefore, Claims 23-28 are allowed.

In regards to Claims 1-16, Claims 1-16 are allowed for the previously indicated reasons in the Office action mailed 27 August 2003, paper no. 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
